Market Time

The average Days On Market (DOM) shows how many days the average Property is on the market before it sells. An upward trend in DOM tends to indicate a move towards more of a Buyer's market, a downward trend a move towards more of a Seller's market. The DOM for March was 130, up 2.4% from 127 days last month and up 49.4% from 87 days in March of last year. The March 2011 DOM was at a mid level compared with March of 2010 and 2009.

Days On Market for Sold Properties

Selling Price per Square Foot

The Selling Price per Square Foot is a great indicator for the direction of Property values. Since Median Sales Price and Average Sales price can be impacted by the 'mix' of high or low end Properties in the market, the selling price per square foot is a more normalized indicator on the direction of Property values. The March 2011 Selling Price per Square Foot of \$304 was up 10.6% from \$275 last month and up 10.2% from 276 in March of last year.

Selling Price vs Original Listing Price

The Selling Price vs Original Listing Price reveals the average amount that Sellers are agreeing to come down from their original list price. The lower the ratio is below 100% the more of a Buyer's market exists, a ratio at or above 100% indicates more of a Seller's market. The March 2011 Selling Price vs Original List Price of 96.7% was up from 95.9% last month and up from 94.9% in March of last year.
