Market Time

The average Days On Market (DOM) shows how many days the average Property is on the market before it sells. An upward trend in DOM tends to indicate a move towards more of a Buyer's market, a downward trend a move towards more of a Seller's market. The DOM for June was 97, down 14.2% from 113 days last month and down 6.7% from 104 days in June of last year. The June 2010 DOM was at its lowest level compared with June of 2009 and 2008.

Days On Market for Sold Properties

Selling Price per Square Foot

The Selling Price per Square Foot is a great indicator for the direction of Property values. Since Median Sales Price and Average Sales price can be impacted by the 'mix' of high or low end Properties in the market, the selling price per square foot is a more normalized indicator on the direction of Property values. The June 2010 Selling Price per Square Foot of \$327 was up 16.5% from \$281 last month and up 5.4% from 310 in June of last year.

Selling Price per Square Foot

Selling Price vs Original Listing Price

The Selling Price vs Original Listing Price reveals the average amount that Sellers are agreeing to come down from their original list price. The lower the ratio is below 100% the more of a Buyer's market exists, a ratio at or above 100% indicates more of a Seller's market. The June 2010 Selling Price vs Original List Price of 95.1% was up from 94.9% last month and up from 93.9% in June of last year.
