Market Time

The average Days On Market (DOM) shows how many days the average Property is on the market before it sells. An upward trend in DOM tends to indicate a move towards more of a Buyer's market, a downward trend a move towards more of a Seller's market. The DOM for May was 115, up 25.0% from 92 days last month and up 1.8% from 113 days in May of last year. The May 2010 DOM was at a mid level compared with May of 2009 and 2008.

Days On Market for Sold Properties

Selling Price per Square Foot

The Selling Price per Square Foot is a great indicator for the direction of Property values. Since Median Sales Price and Average Sales price can be impacted by the 'mix' of high or low end Properties in the market, the selling price per square foot is a more normalized indicator on the direction of Property values. The May 2010 Selling Price per Square Foot of \$281 was down 4.1% from \$293 last month and down -6.4% from 301 in May of last year.

Selling Price vs Original Listing Price

The Selling Price vs Original Listing Price reveals the average amount that Sellers are agreeing to come down from their original list price. The lower the ratio is below 100% the more of a Buyer's market exists, a ratio at or above 100% indicates more of a Seller's market. The May 2010 Selling Price vs Original List Price of 95.1% was down from 95.3% last month and up from 92.6% in May of last year.
